

POCKET BUDDY

A GSM-based tracking device small enough to be concealed in a pocket and capable of working on GSM networks throughout the world.

THE POCKET BUDDY IS A COMPACT, LIGHTWEIGHT PERSONAL TRACKING DEVICE IDEAL FOR EMPLOYEES OR DEPENDENTS TRAVELLING OR WORKING IN HIGHER-RISK ENVIRONMENTS.

THE DEVICE USES THE GSM AND GPRS NETWORKS TO COMMUNICATE WITH THE TRACK24 C4I WEB PLATFORM, WHERE ITS POSITION AND STATUS CAN BE MONITORED ON DIGITAL MAPPING. AN INTEGRAL PANIC BUTTON GIVES THE CARRIER THE CAPABILITY TO SEND OUT A DISTRESS SIGNAL IN THE EVENT OF AN INCIDENT, PINPOINTING THEIR EXACT LOCATION.

The Pocket Buddy interfaces with the Track24 C4i platform – allowing operations staff to view not only their personnel but vehicles and all other classes of assets on one common picture.

Voice channel: Opens up a 2-way voice channel allowing crisis management personnel to listen in and assess the situation.

TRACKING AND MONITORING

Size: Small enough to be concealed in your pocket whilst still providing precise GPS position reports.

Global roaming: Allows business travellers to travel anywhere in the world covered by their service provider's roaming agreement.

Tri-band: Operates on 3 GSM frequency bands (900, 1800, 1900MHz), making it possible to use the same device in multiple countries and regions.

PANIC ALARM

Alarm: Sends a panic alarm via GPRS or SMS triggering audible and visual alerts on the Track24 C4i monitoring software.

Remote monitoring: Alerts can also be automatically forwarded by SMS and e-mail to relevant people.

SPECIFICATIONS

Dimensions: 68 x 45 x 22mm (length x width x height)

Battery life: 30-50 hours at 1-hour reporting

Weight: 75g

Temperature: -10°C to +45°C
